GEN II pictured with Posi Drive Motor System (PDMS)

A Focuser Specifically Designed for the Imager!

**Starlight
Instruments**
When only the best will do!

*Feather
Touch*
Focusers

- Extremely low backlash for automated focusing
- Ultra smooth
- Unique three point Draw Tube Support System design that prevents image shift
- Threaded Draw Tube for camera, spacers, and corrective optics
- Designed for the heaviest cameras and accessories (56lb capacity)
- High resolution with .23 micron per step movement
- Fully ASCOM compatible Motor Drive System
- Direct support in TheSkyX software
